Professional Summary

Motivated Software Engineer and Data Scientist with 2+ years of experience building machine learning models and web applications. Skilled in Python, SQL, and database management. Proven ability to analyze datasets and build predictive models using Scikit-learn and Pandas.

Core Technical Skills

Languages: Python, Java, SQL, HTML, CSS, JavaScript

Libraries & Frameworks: Pandas, NumPy, Scikit-learn, React

Tools & Databases: Git, GitHub, MySQL, Excel, Docker

Concepts: Machine Learning, Web Development, Object-Oriented Programming (OOP)

Education

Bachelor of Technology in Computer Science

XYZ University | Graduated: May 2024

Work Experience & Projects

Junior Software Engineer - TechCorp Solutions (June 2024 - Present)

- Designed and maintained backend REST APIs using Python, Flask, and PostgreSQL database.
- Collaborated with front-end teams to integrate React components with backend services.
- Streamlined code deployments using Git and GitHub actions CI/CD pipelines.

Data Science Project: Customer Churn Predictor

- Built a classification model using Scikit-learn, Pandas, and NumPy to predict customer churn with 88% accuracy.
- Extracted and cleaned customer transactions from MySQL databases using SQL aggregation queries.
